EXPERIENCE

Senior Software Tester

Vortex Engineering Pvt Ltd

- 07/2019
- Chennai, Tamil Nadu

- Developed automated test scripts for regression and functional testing using Playwright in various browsers
- Carried out tests to identify, report, and repair bugs and glitches
- Wrote and optimized test cases to maximize the success of software testing with consistent, thorough approaches
- Assessed software bugs and compiled findings along with suggested resolutions for development team members
- Assisted team with the development of web-based applications in an Agile environment
- Monitored resolution of bugs, tested fixes, and helped developers tackle ongoing problems by providing a QA perspective
- Recommended changes and corrections to developers for optimal software performance and usability
- Operated under Agile and Scrum frameworks to complete releases and well-organized sprints
- Evaluated function, performance, and design compliance of products against design standards and customer needs
- Experience using Jira for bug tracking
- Simulated software production environments to allow for enhanced testing
- Mentored junior testers in best practices for creating effective test cases and reporting results.
- Automated repetitive tasks using scripting languages such as Bash.
- Configured and maintained CI/CD pipelines with Jenkins.

Testing Engineer

Cms info systems ltd

- 05/2017 07/2019
- Chennai, Tamil Nadu

- Tested the ATM Hardware modules and rectified the issues
- Reviewed, evaluated, and identified requirements for the modules
- Provided technical support to Field Engineers and debugged the issue at ATM

Testing Engineer-TRC

Cashlink global systems pvt ltd

- 11/2016 05/2017
- Chennai, Tamil Nadu

- Tested the ATM Hardware modules and rectified the issues
- Reviewed, evaluated, and identified requirements for the modules

Engineer Trainee

A-one biz solutions

- 05/2016 11/2016
- Chennai, Tamil Nadu

- Prepared billing statements for patients and verified correct diagnostic coding
- Communicated with insurance providers to resolve denied claims and resubmitted
- Filed and updated patient information and medical records
- Reviewed patient diagnosis codes to verify accuracy and completeness

SUMMARY

Detail-oriented quality assurance professional with extensive experience in manual application testing and exposure to automated testing processes, particularly with Playwright. I have a strong focus on regression and functional testing, where I develop efficient test cases to ensure high-quality software delivery.
Advanced in AWS, Docker, Kubernetes, Terraform, and Bash scripting, I successfully completed a project deploying a containerized application in modern cloud environments. With a solid foundation in Agile methodologies, I collaborate effectively with project management and development teams to identify and resolve issues throughout the production lifecycle.
Skilled in bug tracking using Jira and knowledgeable in SQL and Linux, I provide insights for optimal software performance. My commitment to continuous improvement and effective communication enables me to contribute to delivering high-quality software solutions.

SKILLS

Agile	Mobile App testing	Android)

Bash script	Core Java	Jira

Linux	Manual Testing

Quality Assurance	Scrum	Sql

AWS	Jenkins CI/CD

Web Application Testing

Git & GitHub	Kubernetes

Terraform	Docker

Playwright Testing Tool

PROJECTS

ATM Monitoring Tool Application

- ATM Monitoring Tool Application, Led the deployment and maintenance of an ATM Monitoring Tool Application designed for diverse bank customers. The system involved hosting servers and setting up databases on-site at various bank premises. The application primarily focused on real-time monitoring of ATMs, Electronic Journal EJ data pulling, and an Incident Management System. It deployed server infrastructure and established database setups tailored to each bank customer's requirements., Collaborated closely with development teams to test and validate application builds, ensuring functionality met client specifications., Oversaw end-to-end testing of the system, including EJ data extraction, incident tracking, and overall monitoring capabilities., Provided ongoing support for the application, troubleshooting issues and implementing improvements as needed., Acted as a bridge between developers and bank stakeholders, communicating progress updates and ensuring alignment with project goals., Successfully implemented the ATM Monitoring Tool Application across multiple bank branches, enhancing operational efficiency and reducing incident response times., Improved system reliability through rigorous testing and validation procedures, minimizing downtime for bank customers., Received positive feedback from stakeholders for clear communication and proactive support throughout the project lifecycle.

Devops

- I completed the DevOps course along with my sample project, available at the GitHub URL below.
